We feed Eukanuba Puppy, small breed now, large breed later (for PBGV’s). The PBGV puppies also need calcium supplement tablets for the first year. I get them at <http://www.jbpet.com> “Pet-Tab Calcium” item # 233-0109, one tablet per day per 20 pounds of weight.

I like having at least one British style 6’ ½” slip (item #028) lead for easy on-off. Just remember to slide the leather catch down around the neck so the dog doesn’t slip out.

I also really like the NYLABONE medium foldable crates instead of the varikennel. Stop & Shop has them for around \$50.

I buy frontline, advantix and heartworm medication at <http://www.petsupplies4less.com>
